Profile

A passionate final-year Computer Engineering undergraduate at the Delhi Technological University, focused on software engineering and full-stack development. Experienced in building real-world web applications with a strong emphasis on collaboration, problem-solving, and continuous growth. Committed to crafting innovative and impactful solutions that make a meaningful difference.

Education

Delhi Technological University — Delhi, India
Bachelor of Technology in Computer Engineering — *2022 – Present*

Zahira College — Kalmunai, Srilanka
Physical Science Stream — *2020*

Experience

Software Developer Intern — NexFort (Pvt) Ltd — Galle, Sri Lanka
Internship — *June 2025 – present*

- Collaborated with the design team in Figma to refine UI/UX workflows and engineered responsive **client and admin dashboards** with scalable component architecture.
- Engineered **modular React architecture** using **Redux Toolkit** and integrated **RESTful APIs** for efficient, real-time data synchronization.
- Implemented secure **SPA authentication** using **Laravel Sanctum**, enabling persistent sessions, route protection, and robust cookie-based security.
- Designed and developed a **comprehensive Admin Settings suite** using **React, Tailwind, and shadcn/ui**, improving admin workflow efficiency.
- Architected a **scalable configuration system** with modular components and centralized state management.
- Optimized performance using **lazy loading and component-level reusability**, ensuring smooth interaction across complex settings pages.

Projects

Queueline – Digital Queue Management System | *Next.js, Tailwind CSS, PostgreSQL, Prisma* — GitHub / Website

- Developed a **real-time digital queue system** replacing physical waiting lines with token-based management.
- Implemented **admin dashboard** for managing services, queue flow, and customer tokens.
- Enabled **public queue access** allowing users to join queues and track real-time position and wait time.
- Designed **smart wait-time estimation** and basic analytics to improve service efficiency.

Formora – Workflow-Driven Form Platform | *Next.js, Tailwind CSS, PostgreSQL, Prisma* — GitHub / Website

- Built a **schema-driven form platform** enabling users to create dynamic forms with customizable fields and validations.
- Implemented a **conditional logic engine** to dynamically show/hide fields based on user input.
- Developed a centralized **dashboard with analytics** to manage and filter responses efficiently.
- Designed **workflow-based actions** triggered on form submissions for automated data handling.

FashShop | *React, Tailwind* — GitHub / Website

- Developed a responsive fashion e-commerce website using **React.js** and **Tailwind CSS**.
- Implemented dynamic product showcases, a dark mode toggle, and an interactive testimonials section.

- Deployed on Netlify with automatic CI/CD for fast and efficient production builds.
- Optimized for seamless user experience across all screen sizes and devices.

Dynamic Nike Shoes Showcase | *React, Tailwind* GitHub / Website

- Developed a responsive and modern **Nike shoe landing page** using **React.js** and **Tailwind CSS**.
- Designed an engaging UI with clean layouts and smooth interactions to showcase products effectively.
- Ensured a fully responsive design for seamless user experience across devices.
- Optimized for performance and scalability with modular React components.

Product Store App | *MongoDB , Express, React, Node, Git* GitHub

- Built a **full-stack** store application using **MERN stack**.
- Implemented **CRUD operations** to enable seamless product creation, retrieval, updating, and deletion.
- Managed backend API endpoints with **Express.js** and **Node.js**, ensuring secure and efficient data handling.
- Deployed the application on **Render** for easy accessibility and scalability.

Personal Portfolio Website | *React, Framer Motion, Tailwind CSS, EmailJS* GitHub / Website

- Designed and developed a fully responsive portfolio website featuring glassmorphism UI and smooth animations using React.js, Tailwind CSS, and Framer Motion for enhanced user experience.
- Implemented dynamic navigation with Intersection Observer API for scroll-triggered section highlighting and seamless page transitions.

Achievements

Got Selected for the Nehru Memorial Scholarship scheme to study Computer Engineering at the Delhi Technological University (formerly Delhi College of Engineering). Scholarship was offered by the Indian Council for Cultural Relations (ICCR).

Technical Skills

Languages: Python, C/C++, JavaScript, TypeScript, HTML/CSS
Frameworks: React, NextJS, Node.js, Express.js, Tailwind
Database: MongoDB, MySQL, PostgreSQL
Developer Tools: Github, Postman, Vercel, VS Code, Figma, PyCharm

Soft Skills

Problem-Solving
Teamwork
Adaptability
Communication
Time Management

Certifications

* **Python Programming**: A comprehensive series of courses in Python Programming through the Open Learning Platform at the University of Moratuwa - Sri Lanka. (Link)
* **The joy of computing using python**: A 12-week course offered by NPTEL, conducted by IIT-Madras. (Link)

Extra-Curricular Activities

* **Member, Electoral Commission**: Served as a member of the Electoral Commission for the DTU International Student Association, ensuring fair and transparent election processes while fostering student engagement and participation.
